53. Tory sells stuffed animals. She sells large stuffed animals for \$9 and small stuffed animals for \$4.

\$4.00

\$9.00

By the end of the day, Tory had sold the same number of large stuffed animals as small stuffed animals. She collected a total of \$65.

How many of each size of stuffed animal did Tory sell?

Tory sold 5 small stuffed animals and 5 large stuffed animals.

Show how you got your answer in the space below.

Explanations will vary.

54. Christy wants to decorate her folder with stars. Large stars cost 75 cents and small stars cost 25 cents. She spent \$8.00 on stars. She bought the same number of large stars as small stars.

25 cents

75 cents

How many small stars and large stars did Christy buy? (You may use a calculator.)

Christy bought 8 small stars and 8 large stars.

Explanations will vary.

55. Nuts To Crunch sells nuts at local stores and on-line. The table shows the prices of nuts from each source.

Nuts To Crunch

Nut	Price (per pound)	
	On-line	Local Store
Peanuts	\$0.99	\$1.49
Almonds	\$4.59	\$4.99
Pistachios	\$2.98	\$3.98
Mixed Nuts	\$2.49	\$3.29

Josh has a \$40.00 gift certificate to use at Nuts To Crunch. If he orders nuts on-line, there is a \$7.00 delivery charge. On-line he can also use a coupon for \$5.00 off any purchase over \$10.00. Josh wants to buy 8 lbs. of peanuts and 5 lbs. of almonds.

Should he buy the nuts on-line or at his local store? on-line

Why or why not? 8 lbs. of peanuts on-line cost \$7.92; 8 pounds of peanuts at the local store cost \$11.96. 5 lbs. of almonds on-line cost \$22.95; 5 lbs. of almonds at the local store cost \$24.95. With coupon and delivery charge, the on-line nuts total cost is \$32.87. At the local store the nuts total cost is \$36.91. Therefore, it would be cheaper to purchase the nuts on-line.
