The proposed middle school budget for the 2009-2010 school year reflects additional textbooks and supplies primarily for Grade 6 and Grade 8 where enrollment is increasing. Current enrollment in grade 6 is 166 and it is projected to be 195 in 2009-2010. Current enrollment in grade 8 is 178 and is projected to be 196 in 2009-2010.

Consumable supplies for areas such as Art, Family and Consumer Science, Technology Education, and the nurse’s office are included. Additional supplies for science are included. These science supplies will be used to accommodate setting up labs in additional classrooms for new staff, facilitate making the science program independent of outside programs, as well as purchasing Alternative Energy kits necessary for curricular changes. No new books are being added to our library, however, we are renewing subscriptions for periodicals currently being used.
